BobiFisher Ltd

Fishing floats & Accessories
FAMILY OWNED SINCE 1996

BobiFisher Ltd with its BobiFisher registered trademark have been established in 1996 in the town of Gabrovo , Bulgaria.

Since the beginning the company has been manufacturing fishing floats and later on in 2004 it opened a wholesale fishing tackle warehouse.

The BobiFisher floats retail in all major stores in Bulgaria through a wide distributing network. They are also available in foreign markets all over the world. Today the company is one of the world leaders in fishing floats manufacturing.

The production facilities of BobiFisher Ltd are situated in Gabrovo on an area of 1000 m2 complying with all European standards and requirements.

The company's average monthly production amounts to 150 000 fishing floats. Equipped with CNC machines to process balsa wood and various densities foam.

The company uses specific software to enable the manufacturing of custom tailored float shapes, weights and models.

The materials used are of the highest quality available and include: wide color range of water and weather resistant Italian paints, high-grade balsa wood (90-100 kg/m3), carbon, fiberglass, hollow or solid Italian made antennae.

BobiFisher Ltd employs over 40 highly skilled specialists. Strict quality control is maintained with each order in line with the company's goal to always offer excellence in meeting all customer demands and requirements at competitive prices.

In the last three years, the company has invested in innovation, purchasing an automated float painting system.

The maximum productivity (painting capacity) in 24 hours based on the maximum number of working panels and products on them is 18,000 pieces.

The system has a simple user interface (user friendly) and there is no human intervention in its operation; allows perfect coverage and perfect drying of the details.

The second important investment is a specialized CNC lathe and a bar feeder for the production of weights for waggles.

The lathe is highly specialized for small details from 3mm to 20mm diameter. In addition to pure turning operations, side milling parts can also be produced.

We also have a large stock of float making materials that we supply to smaller fishing float manufacturers.

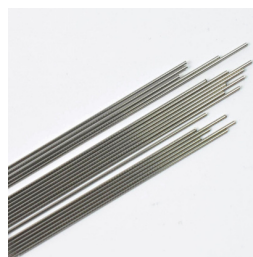

High quality balsa wood, rohacell, EVA material, polyurethane foam, cork.

All kinds of adjustable and non-adjustable waggler weights.

Stems - nitinol, carbon, metal, fiberglass.

Antennae - solid, hollow, fiberglass.
